Care for Life

Every Strong Beginning
Starts With Care.

World Breastfeeding Week

2026 (Aug 1st - 7th)

Nurturing Mothers.
Strengthening Futures.

World Breastfeeding Week 2026

Breastfeeding for a sustainable start in life: **Strengthen what works**

The 2026 theme highlights the importance of strengthening proven breastfeeding support systems through families, healthcare providers, workplaces, communities, and public policies to ensure every mother receives the support she needs and every child gets the healthiest possible start in life.

Objectives

Provides complete nutrition for the first six months of life.

Strengthens a baby's immune system and supports healthy growth.

Reduces the risk of infections and chronic diseases.

Promotes bonding between mother and child.

Contributes to healthier families and a more sustainable future.

Every Child deserves a
Strong Beginning

The strongest beginnings
aren't built in **hospitals.**

They're nurtured

in homes,

in communities,

and in hearts that care.

When a
**mother is
supported,**
a child thrives.

When a
**community
cares,**
every child has t
he chance to
flourish.

This World **Breastfeeding Week,**

let's build communities
where every mother
feels supported
and every child gets
the healthiest
beginning.

Together, We Can Nurture Strong Beginnings.

Because every mother deserves to
feel supported, and every child deserves
the healthiest start in life.

Join Us in Building Healthier Futures.
